PROFILE

Technical Product Manager and Domain Architect with deep expertise in telco BSS/OCS, SIM/eSIM provisioning processes, and MVNE/MVNO platform scaling. Proven track record of designing complex telecom processes and orchestrating API-driven core network provisioning alongside real-time rating and charging. Skilled at translating business constraints into scalable, microservice-driven roadmaps to enable enterprise automation and end-to-end service lifecycle management.

WORK EXPERIENCE

ÖBB (Rail Cargo Group)

Domain Architect MAY 2026 - PRESENT

- Leading the modernization of legacy enterprise applications into scalable, cloud-native microservices for the Railway Undertaking domain.
- Defining the architectural strategy and technical product vision, ensuring alignment between corporate business stakeholders and engineering execution.

CompaxDigital

Lead Technical Product Owner 2024 - 2026

- Directed technical design and delivery of advanced telecom workflows, managing end-to-end SIM/eSIM provisioning and cross-system alignment.
- Served as a key technical leader in scaling the whitelabel MVNE/MVNO platform, orchestrating API-driven core network provisioning and service lifecycle management to enable rapid go-to-market for multiple tenants.
- Architected the end-to-end integration of the Compax BSS with the i-new OCS, designing scalable data flows for real-time rating, charging, and automated service provisioning across platforms.
- Led roadmap execution and strategic alignment for 3 cross-functional teams (3 POs, 21 Devs/QAs) distributed across Austria and Asia.

Technical Product Owner 2023 - 2024

- Managed a distributed European team (6 Devs/QAs), delivering high-availability BSS features focused on automation and workflow efficiency.
- Owned backlog, defined user stories, and coordinated sprints and releases.
- Provided hands-on presales support, presenting technical system architectures to prospective clients and securing 4 enterprise accounts.

Software Developer 2022 - 2023

- Developed backend and frontend CRM modules using Java and PostgreSQL within a microservice architecture.
- Collaborated with QA and product teams to resolve complex issues and ensure end-to-end feature releases.

EDUCATION

BSc Computer Science 2018 - 2022

The Open University
Israel

- Recipient of President's Honor (2020) and Dean's Honor (2021) for academic excellence
